

Outils web pour votre vie numérique

Journée du logiciel libre, samedi 16 septembre 2017

Au menu

Introduction (logiciels libres, association Framasoft...)

Outils web

- Gérer des tâches
- Synchroniser des documents
- Partager un fichier ou texte brut
- Prendre des notes
- Conserver des pages Web
- Documenter dans un wiki
- Collaborer autour de documents
- Produire des factures

Présentateur

Gabriel Cossette

Conseiller technique

Architecture d'entreprise

Services partagés Canada

Intérêts

- Découvrir et démystifier les logiciels libres
- Échanger et collaborer (wiki, forums, etc.)
- Héberger et concevoir des sites Web (WebLibre.ca)

Avantages logiciel libre

Respect de votre vie privée

Contrôle de vos données

Ne pas subir une fermeture de service

Interface utilisateur stable

Contribuer au bien commun

Sécurité vérifiable

Meilleurs prix des services (compétition)

2 choix pour les utiliser

Installer sur votre propre serveur

Via hébergement :

- Partagé (autogéré – logiciels PHP seulement)
- VPS (demande compétences Linux)

ou...

Acheter un service en ligne tout prêt

Framasoft

Association française sans but lucratif

Financement par dons

Projet **Dégooglisons Internet**

- +25 services basés logiciels libres
- Sans publicités & respect vie privée
- Auto-hébergement encouragé ([instructions](#))
- Alternatives aux services Web populaires comme Google Docs, Skype, Evernote, Doodle, Pocket, Trello, Slack, etc.

Collectif **CHATONS**

- Hébergeurs **A**lternatifs, **T**ransparents, **O**uverts, **N**eutres et **S**olidaires ([FACIL](#) est membre ;)

Gérer des tâches

Kanboard

Gestion multi-utilisateurs de tâches

Style Kanban en colonnes

Multiples projets

Glisser-déposer

Diagramme de Gantt et autres rapports

Requis : Nginx + PHP + MySQL | Docker

Service : [Framaboard](#)

Gérer des tâches

Synchroniser des documents

Seafile

Synchronisation « à la Dropbox »

Encryption locale

Historique des versions

Partage entre utilisateurs

Web, PC et application mobile

Requis : Nginx + MySQL | Docker

Service : [YourSecureCloud](#) | [BlueiTech](#)

Synchroniser des documents

The screenshot displays the Seafiler web interface. At the top left is the Seafiler logo. A search bar on the top right contains the text "Search files in this library". The left sidebar is divided into sections: "Files" with "My Libraries" selected, "Tools" with "Favorites", "Activities", and "Linked Devices", and "Share Admin" with "Libraries", "Folders", and "Links". The main content area shows "My Libraries / My Library" with buttons for "Upload", "New", and "Share". Below these are icons for a list view and a grid view, along with trash and refresh icons. A table lists five files:

	Name ▲	Size	Last Update
<input type="checkbox"/> ☆	 seafiler-tutorial.doc	293.5 KB	2 hours ago
<input type="checkbox"/> ☆	 test.docx	9.0 KB	2 hours ago
<input type="checkbox"/> ☆	 test.pptx	26.9 KB	2 hours ago
<input type="checkbox"/> ☆	 test.xlsx	7.5 KB	2 hours ago

At the bottom left, there are links for "Help About" and "Clients".

Prendre des notes

StandardNotes

Encryption locale

Exportation facile des données

Syntaxe Markdown

Web, PC et application mobile

Requis : Nginx + Ruby

Service : [StandardNotes](#)

Prendre des notes

The screenshot shows a desktop application for taking notes. On the left, there is a sidebar with a 'Tags' section containing a list of categories and their counts: All (33), blog (7), business (11), food (6), learnings (5), and todo (4). Below this is a search bar and a 'Sort' section. The main area displays a list of notes, with the top note titled 'Complete fascination' selected. This note is marked with the tag '#todo' and contains several paragraphs of text discussing various topics like statistics, league management, and team dynamics. The interface includes a 'Menu Editor Actions' bar at the top of the note view and a status indicator 'All changes saved'.

The screenshot shows a mobile application for taking notes. The main screen displays a list of notes with titles such as 'They must have Google', 'Moving beyond localStorage', 'WebCrypto and IndexedDB', 'WebCrypto and IndexedDB: a new era for...', 'The difference being nice can make', 'Encryption must come standard.', and 'Taking Risks Accelerates Progress'. A red overlay on the right side shows a detailed view of a note titled 'Subscription model', which includes a description and a timestamp. The interface features a bottom navigation bar with a 'Notes' icon and a red '+' button for adding new notes.

Conserver des pages Web

[wallabag](#)

Ajouter des pages Web pour lecture ultérieure

Annotations

Intégration dans le navigateur

Web, PC, application mobile et liseuse

Requis : Nginx + PHP | Docker

Service : [Framabag](#) | [wallabag](#)

Conserver des pages Web

The screenshot displays the Wallabag Archive interface. On the left is a sidebar with the Wallabag logo and navigation links: unread, starred, archive (highlighted), tags, config, howto, and logout. The main area is titled 'Archive' and shows 16 entries. A red notification badge with the number '1' is visible in the top right corner. The interface features a grid of six article cards, each with a title, estimated reading time, a short text preview, and a source URL at the bottom. Each card also includes icons for refresh, favorite, and delete.

DokuWiki

DokuWiki is a simple to use and highly versatile Open Source [wiki](#) software that doesn't require a database. It is loved by users for its clean and readable [syntax](#). The ease of maintenance, backup and integration makes it an administrator's favorite. Built in [access controls](#) and [authentication connectors](#) make DokuWiki especially useful in the enterprise context and the large number of [plugins](#) contributed by its vibrant community allow for a broad range of use cases beyond a traditional wiki.

Get started: [Download](#)

Why DokuWiki?

DokuWiki is a popular choice when choosing a Wiki software and has many advantages over similar software.

- Easy to install and use
- Low system requirements
- Built-in Access Control Lists
- Large variety of extensions
- Over 50 languages supported
- Device independent
- Open Source

[Learn more about DokuWiki features](#)

Use Cases

Wikis are quick to update and new pages are easily added. Designed for collaboration while maintaining a history of every change, DokuWiki could be used as

- Corporate Knowledge Base
- Private notebook
- Software manual
- Project workspace
- [CMS](#) – intranet

Customizing DokuWiki

We support customization on all levels of expertise. From easy configuration via the admin interface

Services : [CryptPad](#)

Collaborer autour de documents

The screenshot shows a web browser window with the URL <https://cryptpad.fr/pad/#/1/edit/PxkQYJtzKm-ZmVe3Xsm...>. The page title is "CryptPad Encryption Algorithms". The interface features a dark blue header with the site name and a user profile picture. A left sidebar displays a "Users" list with three members: ansuz, Caleb, and Pierre. The main editing area has a rich text editor toolbar with various icons for text formatting and alignment. The document content is as follows:

CryptPad Encryption Algorithms

- Threat model is an "honest but curious" cloud server
- 100% client side (in the browser using Javascript)
- Key derivation from username and password using scrypt
- Pads are encrypted using salsa20-poly1305 (tweetnacl.js) with randomly generated symmetric keys
 - Technically what is encrypted is a sequence of patches, thus precluding known plaintext type attacks on changing ciphertext
- Sharing a pad by URL facilitated by putting the pad key into the URL after the # mark (HTTP spec says this is never sent to the server)
- Changes to a pad are also signed using ed25519 and the signing public key is known to the server, thus allowing "read-only access" (having the decryption
